

**REMARKS**

Claims 62-73 are pending in this Application. Claims 34-36 and 70-73 have been withdrawn and claims 1-33 and 37-61 have been cancelled. Applicants reserve the right to pursue the original claims and other claims in this and in other applications.

The Application has been carefully reviewed in light of the Office Action mailed on April 20, 2005. Reconsideration of all outstanding rejections and objections in view of the foregoing amendments and following remarks is respectfully requested.

The specification has been amended to updated the current information of the patent upon which the current patent application relies upon. No new matter has been added.

Claims 62-69 stand rejected under 35 U.S.C. § 103 (a) as being unpatentable in view of Seyyedy (U.S. Pat. No. 6,754,124).(Seyyedy). Seyyedy is only available as prior art under 35 U.S.C. 102(e); however, since Seyyedy and the present application have the same assignee—namely, Micron Technology, Inc. 35 U.S.C. 103(c) precludes a rejection under 103(a).

In view of the above, each of the presently pending claims in this application is believed to be in immediate condition for allowance. Accordingly, the Examiner is respectfully requested to pass this application to issue.
